

## **Council Update regarding Public Boat Launch 40 Angus Point Rd, Eagle Lake – Costs Eagle Lake Estates Park**

---

The tender price for the project has not changed from last year. The project tender came in at \$55,000. An additional turbidity curtain will be added at a cost of \$3,000. The portion of funding applied for that may have come from Fednor, but has been denied will come from Parkland. Parkland funds are generated by the Township through cash-in-lieu requirements for severances and lakeshore road closing land sales. Parkland funds are designated that they can only be used for Park purposes. Brushing and gravel at the site will be done by Township forces from regular maintenance funds. The dock walkway and ramp launch will include a 9 metre side yard setback maintaining the beach area. The walkway and ramp will improve the accessibility. The upgrade will provide Fire, Ambulance and Police with proper access to Eagle Lake.

Council previously issued a Statement regarding the Public Boat Launch as well as Responses 1 and 2. Council further issued Updates 1 and 2 regarding the Public Boat Launch. This is Update 3. All of these documents have been, and continue to be prominently displayed on our website for citizen information.

We want to thank our citizens for your continued patience throughout the process and for your support.
