

## **STATEMENT – EAGLE LAKE RD**

We were ecstatic to receive 90% funding from the Province for the rehabilitation of Eagle Lake Rd. Staff and Council pursued funding opportunities for several years to achieve this project. The project was tendered by contract and tenders from 4 construction firms were opened on Jun 8, 2018. The tender was awarded on Jun 11, 2018. Construction on the rehabilitation of Eagle Lake Rd was scheduled to start on Jul 3, 2018 and included hard surface of the shoulders of the road to provide increased safety for cyclists and pedestrians. The project included ditching, rock excavation, granular application, culverts and guiderails as well as double surface treatment. Eagle Lake Rd is surfaced with a Double Surface Treatment. This is the same surface treatment that was previously on the road. Unfortunately, the end result is not what was anticipated. This will result in the project being extended into 2019. We are working with our engineering consultant and the contractor to determine the problem and get it corrected. There are assurances within the tendered contract and holdback amounts. In the meantime, the contractor has been patching potholes and we're doing our best to mitigate the inconvenience to our citizens. We thank you for your patience throughout the construction, and ask for your continued patience as we work to resolve this issue. Please reduce your speed on the Eagle Lake Rd until such time as the road has been repaired. Again, we extend our thanks to you for your patience and for your understanding during this difficult time. We appreciate your support and we're making all efforts to remedy as quickly as possible.
